SKILLS   React, Redux, Express, Python, Javascript, HTML, CSS, SQL

PROJECTS

Amazan (Flask, React)   live | github

A web app inspired by Amazon, built using Flask and React.
- Leveraged multiple CRUD features in order to replicate Amazon's website as much as possible.
- Implemented user privacy and limitations on features accessible by users through frontend and backend measures, allowing users to only access and make changes to their own reservations when logged in.
-

Flickrio (React, Express)   live | github

Flickrio is a clone of Flickr built using React and Express.
- Utilized React for the first time to build a web app
- (not quite sure what to say about this project)

Spell Overflow (Express)   live | github

Spell Overflow is a clone of Stack Overflow (with a magical twist) built using Express and Sequelize.
- Facilitated a team to ensure the success of development of the web app.
- First group project developing a web app through the use of Express.
- Nurtured leadership and communication skills through effective time management and workflow for the team.

Quickstarter (Flask, React)   live | github

Quickstarter is a clone of Kickstarter built using Flask and React.
- Partnered with fellow software engineers to work together to build a web app
- Participated in learning and developing features that were unfamiliar to the team

EXPERIENCE

Cashier

Peking Dumpling   Aug 2015 - Nov 2021
- Blended into the workflow to become a valuable asset to the business
- Fostered communication skills and customer service skills

Clerk

Woori Pharmacy   Dec 2018 - Mar 2019
- Improved workflow through efficient management of inventory of products
- Operated and maintained an autosorter RX machine
- Assimilated into the work environment to aid in filling multiple prescriptions at the same time

EDUCATION

Web Development - *App Academy | Winter 2021*
BA Education - *University of California - Riverside | 2019 - 2021*
